Creating First Linux Instance

Stop instance

Stopping your instance allows you to reduce costs, modify settings, and troubleshoot problems.

Instance ID	Stop protection	Result
i-00dc4834d14ba807a (my-first-linux-server)	Disabled	Can stop

Associated resources

You will continue to incur charges for these resources while the instance is stopped

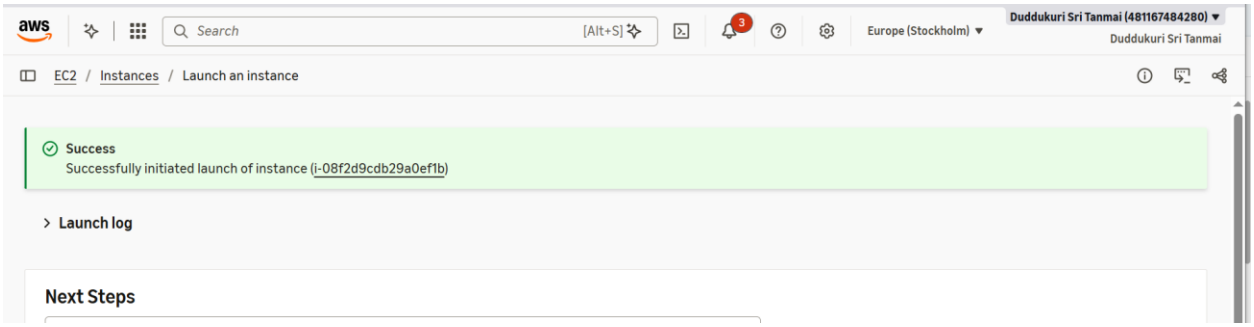

You will be billed for associated resources

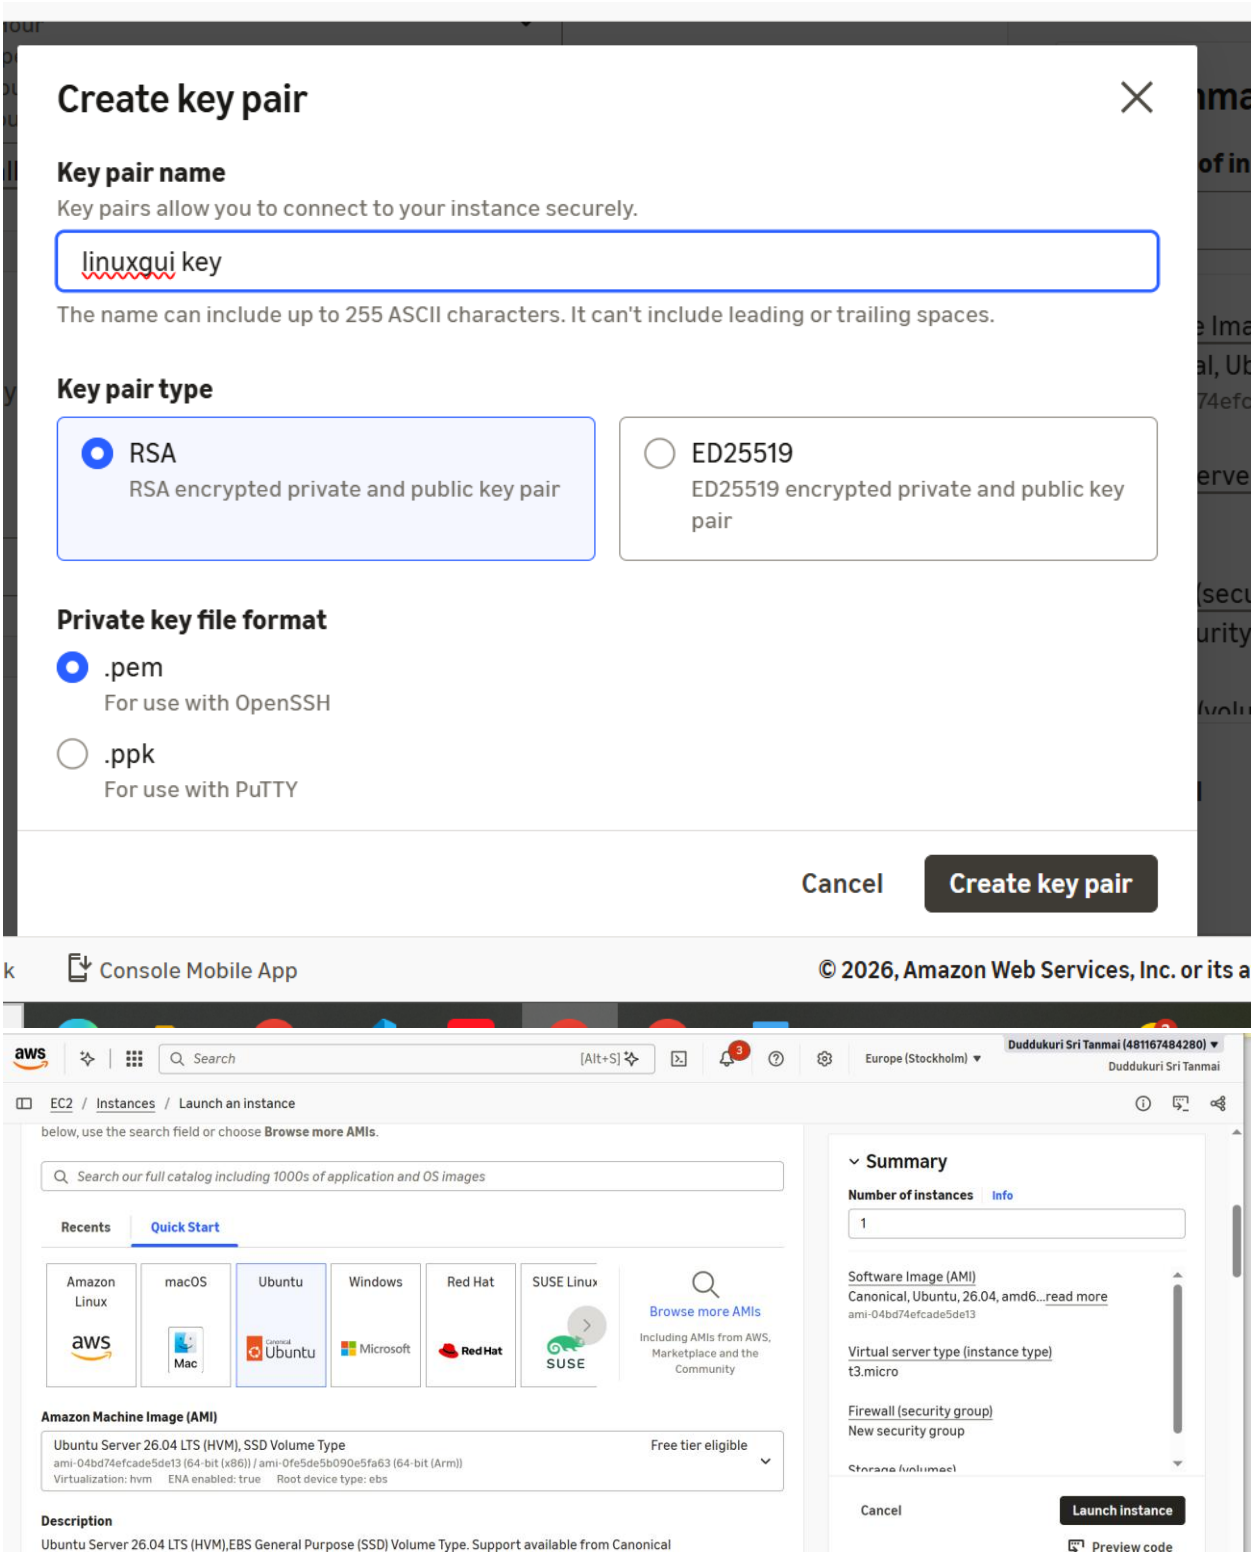

After you stop the instance, you are no longer charged usage or data transfer fees for it. However, you will still be billed for associated Elastic IP addresses and EBS volumes.

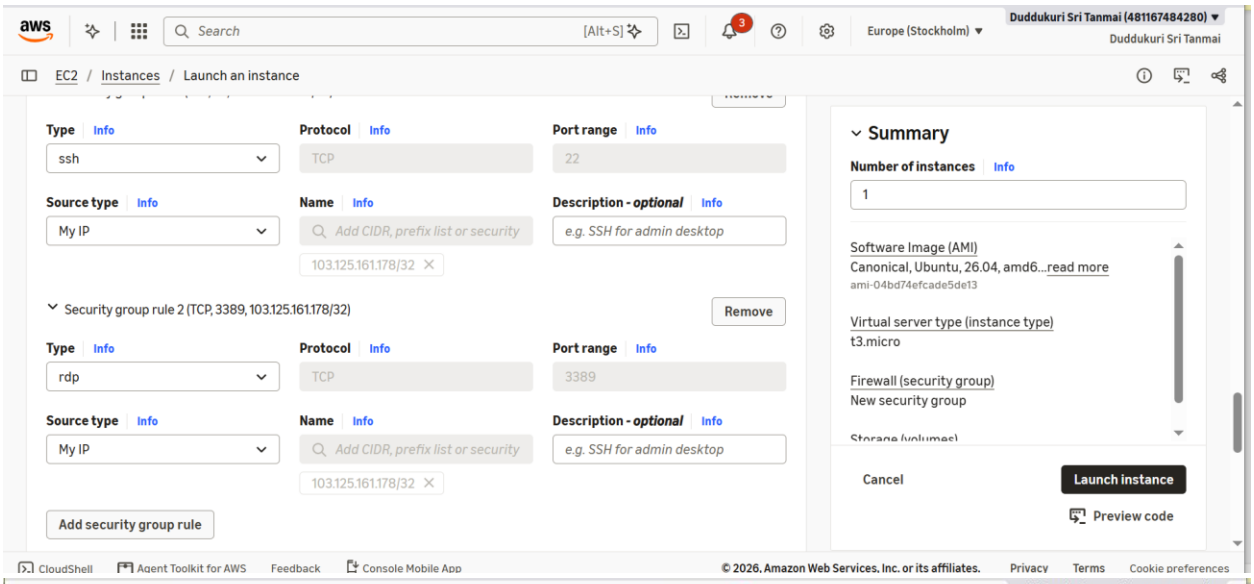

Skip OS shutdown

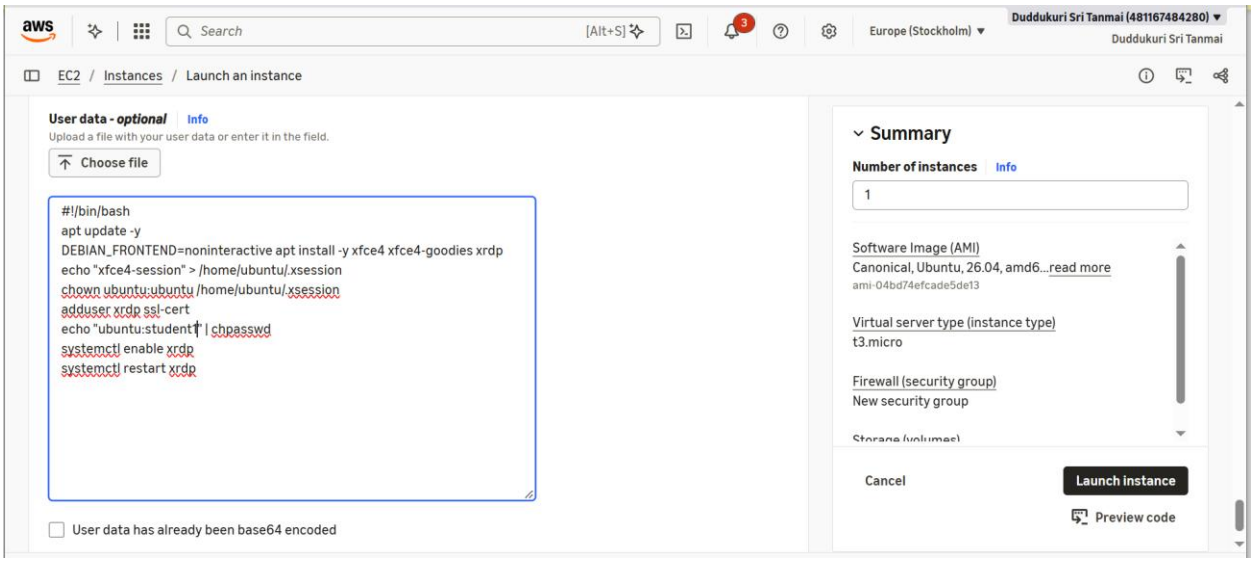

This option skips the graceful OS shutdown process. Use only when your instance must be stopped immediately, such as during an emergency or failover.
