EC2 / Instances / i-01b9076c25205ce55 / Connect to instance
Connect to Linux instance Info
Connect to an instance to test, troubleshoot, deploy code, update software etc. You can use browser based methods or an SSH client.
Instance info
Instance
i-01b9076c25205ce55 (nginx server)
State: Running
Status: 3/3 checks passed
VPC
vpc-0b6cbfd1e3a330b0e
Subnet
subnet-0bfe1ea16fb8e1dff
Security groups
sg-018b5f862263d39d4 (launch-wizard-1)
In web browser
In SSH client
Choose how to connect
Public subnet access
Managed SSH keys
EC2 Instance Connect
Use for instances with public IPs or accessible via standard routing. Requires network connectivity to your instance. Connect using
Private subnet access
Managed SSH keys
EC2 Instance Connect Endpoint
Use for instances in private subnets. Traffic is routed through a VPC endpoint. Connect using temporary SSH keys managed by AWS.
Maximum security
IAM authentication
SSM Session Manager
Uses IAM-based authentication. Connect without SSH keys, bastion hosts, or opening any inbound ports.
Direct
Troubleshoot
EC2 Serial Console
Access your instance's serial port for troubleshooting boot, network, and OS issues. Works without network connectivity. Requires account-level enablement.

Amazon S3 / Buckets / Create bucket
Recommended for most use cases and access patterns. General purpose buckets are the original S3 bucket type. They allow a mix of storage classes that redundantly store objects across multiple Availability Zones.
Recommended for low-latency use cases. These buckets use only the S3 Express One Zone storage class, which provides faster processing of data within a single Availability Zone.
Bucket namespace
Choose the namespace where you want to create your bucket. Learn more
Global namespace
By default, S3 creates general purpose buckets in the global namespace.
Account Regional namespace (recommended)
General purpose buckets created in your account Regional namespace are unique to your account. These buckets can never be created by another AWS account.
Bucket name Info
tanmaisbucket
Bucket names must be 3 to 63 characters and unique within the global namespace. Bucket names must also begin and end with a letter or number. Valid characters are a-z, 0-9, periods (.), and hyphens (-). Learn more
Copy settings from existing bucket - optional
Only the bucket settings in the following configuration are copied.
Choose bucket
Format: s3://bucket/prefix
